B	1.2V
C	0.4V
E	6.2V

THE SERVICE PRECAUTION:
The area enclosed by this line (▲) is directly connected with AC mains voltage. When servicing the area, connect an isolating transformer between TV receiver and AC line to eliminate hazard of electric shock.

Q511	
VOLT.	
B	13.5V
C	0.8V
E	13.5V

Q512		
VOLT.	WAVEFORM	
B - 0.1V		4.2Vp-p
C - 0.1V		4.4Vp-p
E 0V	-----	-----

Q513

VOLT.	
B	6.7V
C	35.5V
E	6.2V

CIRCUIT DIAGRAM NOTICE:

- All resistance value are in ohms, K=1,000, M=1,000.
- All resistance rated wattages are 1/6W unless other.
- Excepting electrolytic capacitors, all capacitance val expressed in μ F and more than 1 are pF.
- All capacitance rated voltages are 50V unless other.
- All inductance values are in μ H.
- Voltage readings taken with taken with a "VTVM" an chassis ground. Voltage readings taken by using a with all controls at normal position. Some voltages strength.
- Waveforms were taken with colour bar and control picture. Waveforms were taken by using a wide bar low capacity probe.
- This circuit diagram covers a basic or representative may be some components or partial circuit difference chassis and the circuit diagram.

C14EA13EX - 01

PRODUCT SAFETY NOTICE:
Product safety should be considered when a component replacement is made in any area of a receiver. Components indicated by a mark ▲ in this circuit diagram show components whose values have special significance to product safety. It is particularly recommended that only parts specified on the part service manual be used for components replacement pointed out by the mark.
